

Bridge Construction Work

Three local bridge closures will affect access points to the City from the south and west. The affected bridges are the Oregon City/West Linn "Arch" Bridge, Fields Park Bridge, and Stafford Bridge.

These projects are managed by the Oregon Department of Transportation and Clackamas County, and are financed with Oregon Transportation Improvements Act (OTIA) funding. Click on the links below to learn more about each project. Questions about these closures should be directed to the contact information listed with each project below.
